Commonly Used For Crops such as:

**Tomatoes Lettuce
Onions Basil Thyme Oregano
Ficus Spathiphyllum Ivy Zinnia
Gerbera Roses**

**HORTICUBES®
Growing Medium**

Item # 5231RP-1

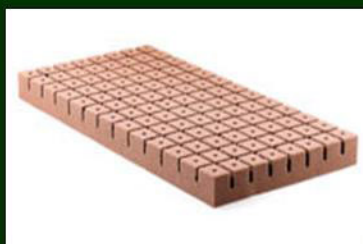

12 x 23 rows
276 cells per sheet
Cell Size: 1" x 1" x 1.5"
2 sheets per box

**HORTICUBES®
Growing Medium**

Item # 5240RP-1

8 x 13 rows
104 cells per sheet
Cell Size: 1" x 1.25" x 1.5"
2 sheets per box

What Makes Horticubes® Growing Medium Ideal for Hydroponics?

Horticubes® Media is a low density, high drainage foam with characteristics specifically developed for hydroponics seed germination and vegetative propagation of vegetables, herbs, flowers, and foliage crops. The excellent performance of Horticubes Media is based upon its unique cell structure which closely resembles the cellular structure of plants. This characteristic allows for an optimal balance of oxygen and water, even when Horticubes Media is saturated with water.

What Makes Horticubes® Growing Medium So Convenient to Use?

All Horticubes Media sheets measure 10" x 20" and fit into industry standard 1020 trays. Each sheet is pre-scored for easy removal of a single cube, block of cubes, or strip of cubes, thereby delivering maximum flexibility in bench spacing. Also, each cube has been pre-punched with a dibble hole for quick and easy seed or plant cutting insertion. Best of all, Horticubes Media is ready to go and easy to use; simply wet it down and start seeding or sticking cuttings.

Product Benefits

- **Easy to use — just add water and sow seeds or stick plant cuttings**
- **High drainage product characteristic is ideal for hydroponics growing**
- **Specially engineered balance of water and air promotes vigorous root development**
- **Sterile sheets reduce disease problems**
- **Pre-dibbled holes makes for easy seed sowing and sticking**
- **Consistent product quality cell to cell**
- **Versatile and Flexible**
